

Green Belt Release - Woking Council's Site Allocations DPD

To Whom it May Concern

I have lived in Byfleet for 42 years and have seen some dramatic changes. I want to let you know my feelings on the Green Belt and how I don't agree with its release for building on. The Green Belt must be preserved especially when there is other land available. The existing infrastructure is already at its capacity with the local schools being full (I know this as my daughter has to school in Ripley)! It's a long wait for a Doctor's appointment, the roads are already gridlocked at rush hour and earlier if there has been a problem on the M25. The Parvis Road now queues from as early as 3:45pm and doesn't stop until late evening. You cannot possibly think about adding more dwellings until this is rectified. Plans for a 900 pupil private school will bring more cars in from more affluent areas to drop the children off. The Green belt land has been flooded and could potentially flood again. Putting more hard standing on the land will put other areas at risk of flooding too.

I signed the Byfleet petition with had over 2,000 names on it all wanting the Green belt preserved but have been told that Woking Council are ignoring it even though it was for preserving Green Belt in Byfleet and a receipt was signed and given to the persons who handed it over.

Did you do a survey looking for Brown Field sites before spending money on Green belt plans? I believe the answer was no at the meeting held in the village recently.

Please stop and think about what you are proposing, and how it will effect residents lives.

Kind Regards

Vicki Baldwin
