We wish to object to the building on Green Belt Land which is prone to flooding. The more houses you build the higher the risk to the original properties.

The roads in Byfleet are gridlocked at various times in the day & the addition of a 900 place school & housing in Broadoaks will only worsen the current traffic problem.

The councils highway maintenance dept are incapable of supplying a good service at the moment.e.g.the pedestrian controlled traffic lights in Oyster Lane & numerous potholes still around the area.

This building work will cause noise, environmental pollution & spoil the village atmosphere of Byfleet with no Green Belt to enjoy.
