Over recent years we have experienced, on a number of occasions, significant flooding in our garden which is adjacent to Silverly. The drainage of rainwater down from Pyle Hill to New Lane is wholly inadequate and has been of concern for some time.

At times, the floodwater in our garden has reached almost 2 feet in depth and has been an inch or so from breaching the door threshold of our property. We are concerned that building a property on Silverly which currently has very poor drainage, would exacerbate the flooding problems we experience and would result in more water logging of our garden and would increase the risk of water breaching our property.
