Objection - Do not support the inclusion of existing Common Land in this area into a SANG site. However, welcome the supply of the new land to the south of the common as new SANG to be incorporated with 1st SANG site to the east as it would increase public access to open space however Any car parks etc should be installed on the new SANG land not the common land. However this land is prone to periodic flooding which would reduce its potential utility to recreational users. In particular dog walkers will not bring their dogs to this SANG when it floods. If they do not bring their dogs when flooded, then they would probably never bring them and therefore the proposed SANG would fail to draw walkers away from the SPA. Additional traffic movements to the SANG and impacts on local traffic infrastructure needs to be considered as well.
