Subject: Pyrford Housing

Dear Jeni,

My name is Ellie Davey, I'm 16 years old and I live at 45 Hamilton Avenue, GU22 8RU, with my mother, father, two brothers and sister. I have lived in Pyrford all my life and one of the reasons my parents chose to move here is because it is a peaceful village and not many people live here so we can go out and not have to worry as much about cars and other people. However this will all be destroyed once the new houses are built, ruining the idyllic childhood village I grew up in.

As a child, I could simply walk to the local park and playing fields, joining in in the numerous events held such as the flower show. This was a big part of my childhood as every one got involved together as a community. If hundreds more families move here then this will also be ruined as will our lovely community. Pyrford is not a large village, it is a small area where families can grow up or the elderly come to retire. It's beautiful scenery is one we don't have to travel to see, and we have a local school full of respectable children as well as a loving church. Imagine the havoc that would be caused if more people chose to destroy this. By building the houses you will be taking away the small greenery Pyrford has as well as cause families choosing to move here to go somewhere else as the serene, peaceful village will soon not be anymore. The building of the houses will also damage the local economy. It already takes a month to book a doctors appointment so imagine how long it will take when more people are able to move here. There will also be a long waiting list for the schools which aren't very big, as well as increased traffic causing pollution and more road accidents. As well as this the local woodland and park are likely to also get damaged and there to be an increase in litter, making our lovely community one we are ashamed of.

All I ask is for you to reconsider building houses here and meet with all of us to here our objections and voice your ideas. The houses built will be smaller and won't fit in with the current houses. Finally, as I have already said, there is not that much land or space for hundreds more houses or families meaning more money will be needed to be spent on keeping the roads safe, more doctors and more schools to accommodate all the new people. Please don't ruin mine and many others childhood village or place to retire.

Yours Sincerely,
Ellie Davey
