## Your views on the Site Allocations document

This section is for providing comments regarding the Draft Site Allocations DPD. Please provide as much detail as possible, for example the page or paragraph numbers to which your comment relates and explain any changes you consider should be made to the document.

This section can also be used to suggest a new potential development site to the Council (please state the full site address and contact details for the landowner(s) in your comments).

Please give us your comment	1.Years ago it was established that this site was too contaminated for development.It had numerous hazardous chemicals and waste,including Methane embedded in the ground.It would appear that it is now expedient to ignore these hazards and press ahead for financial reasons.The problems identified then are still present now,if It was unsafe then it is unsafe now. 2.The traffic to and from this site would make the current traffic problems much worse,both in the constuction phase and on completion.The adjacent railway arch has height restrictions and adjacent Scotland Bridge has weight restrictions.Site traffic ,delivery lorries and outgoing lorries would need to use a route through residential roads (Station Road etc.) to avoid these problems.This is a situation that we were assured would never be allowed to happen when the original industrial estate was built.Of course we should welcome businesses and jobs to the area but ,unless there is some other access route,the current road

access make this development unrealistic.

Proposed modifications - Please explain what changes you consider should be made (for example, to the text, to the site boundary)
