To: Planning Policy

We realise that more (affordable) housing is desperately required and we are not averse to some of this being in the Byfleet area.

However, we have considerable concerns about the ability of the infrastructure to support the proposed developments in Byfleet:

- Of the various limitations of the local infrastructure to cope with the proposed development our main concern is with the absence of healthcare facilities in the village, particularly we have no General Practice. In addition, the state of some of the roads, flooding of roads and other areas, school provision, are of considerable concern.

- Parvis Road is frequently jammed with traffic, a situation that could only be made worse by the increased traffic associated with the proposed development.
