I am writing regarding the proposed building of 423 houses in land either side of Upshot Lane in Pyrford.

To build houses on a plot of land is one thing, but you have to consider what the consequences could be.

1. With some extra 600 or more cars using our small roads congestion in the mornings and evenings would be intolerable.
2. The number of children living there, say another 600-800 would have nowhere to go to school. Schools in Pyrford and West Byfleet are already full.
3. Our health Centres which are already overcrowded could not possibly handle another 1500 people and that's only say 3 per household.
4. This is Green Belt and you have always said it should remain so.

In view of the above I would ask you to disregard this plan to build on this site.
