Subject: Proposed release of green belt land throughout Woking specifically the two large fields in Pyrford

Sent from my iPad

Dear Ms Jackson

I would like to register my objection to WBC proposal to release Green Belt Land in Pyrford for two large housing developments .
The local infrastructure cannot cope with an influx of over 400 families , it's getting near capacity now , creaking at the seams.

Roads

Upshot Lane which borders both fields , is a narrow lane with no footpaths , it would be impossible for residents of the proposed developments to walk their children to the local school Coldharbour Lane is already clogged with traffic during the school run ,and resembles a one way system with all the parked cars , very dangerous to children .

Where will the residents access roads be , if they lead on to Pyrford Common Road , the extra traffic , would create mayhem , either towards Ripley , (over an ancient narrow bridge and width restricted access) or the Old Woking Road left to Woking , or right to West Byfleet both bottlenecks in rush hour .

Bus Service

We have an unreliable bus service , 1 bus an hour to either Woking or West Byfleet , often late and quite regularly fails to turn up at all . So with the lack of public transport , new residents will be forced to use their cars , increasing the green house gasses .

Health Care

It sometime takes now , up to a month to get a non urgent doctors appointment , even longer if you want to see a specific doctor .

Schools

The local primary school is already inviting residents to a public exhibition to show its plan for improvement, how will they manage with all the extra children .

I could go on , utilities , local amenities. How will any of them cope .?

Councils seem to release land and hope that everything will be okay , surely you should improve the local infrastructure , before even thinking about large developments , especially in such a small village as Pyrford . If these proposals go ahead will the council commit to undertake the necessary expansion for the local hospital , schools , health centre , shopping facilities , public transport and roads .
