I live in Byfleet and although I appreciate the need for new homes am slightly concerned regarding the development of this area. Byfleet roads are a nightmare, they are either congested or people drive far to fast down the parvis road. There seems to have been a build upon of traffic over the years which is in unison with the building of new homes.

Byfleet already doesn't have a Dr surgery and only one dentist. The clinics in west Byfleet can't get you a non urgent app for 3 weeks, how is it gonna cope with more people moving into the area?

Schools are full to capacity

Much of the land purposed for building on has been flooded or is in danger of flooding.

The development will remove most of our local green belt while other areas have almost all of theres preserved.

You must consider the needs of the local people before developing and think about our facilities and improving them first.

The railway bridge on oyster lane would need to be widened to allow two way traffic to ease congestion.

Regards
