To whom it may concern,

I would like to complain about your proposals to develop green belt land around Byfleet.

- 1: Byfleet is already a crowded village with a lack of decent facilities, further housing development will only make the area even more crowded and cause further strain on local facilities.
- 2: Byfleet is on a floodplain, please explain to me where flood water will go if you develop the green belt?
- 3: The roads around Byfleet are already gridlocked, further housing will only add to this by expected car use of the people living in these housing developments.
- 4: The Byfleet residents have very valid concerns so please do not dismiss our views!
- 5: The local area needs better facilities and infrastructure rather than further housing and development.

I am against any further housing development in or around the Byfleet area, I want the green belt preserved for future generations of my family to enjoy,

Regards,

Paul Hilleard
