Dear Jeni.

Our lovely village is under threat and I hope that bothers you and your department.

We are blessed with a vibrant community, beautiful countryside, historic buildings and conservation areas. People want to come and live here because of the pleasant environment and once here they stay put. However, we already suffer from traffic congestion and the safety concerns that brings with it. Is it a good idea to introduce 433 new homes, adding greatly to the problem, when other areas in the borough have been identified as being more suitable? Roads, water and sewerage are just some of the environmental concerns I have but there is also the possible loss of habitat. Have you taken a stroll along our lovely canal recently? A healthy community requires a pleasant and safe environment in order to flourish .

However, we are not totally NIMBY in our outlook. Provide us with some attractive homes suitable for the elderly wishing to downsize and free up family homes for the young. But please, please, please recognise that Pyrford is a very special village worthy of special consideration and do not fill our beautiful green spaces with housing developments.

Regards,

*Patricia Hounsell*
