Subject: Future plans for Pырford

I am writing to register my concerns re your future development plan for Pырford.

I am most concerned that the plans will end up destroying the green belt , and the corridors of local biodiversity , that forms such an essential part of our community and the reason why I chose to live here.

I am concerned that there is little evidence about the impact of proposals on local infrastructure that is already dangerously congested with commuters cutting through the village and a very congested 'school run' with parents and guardians dropping off and collecting children at the school twice every day.

It is clear that you have more practical and less impactful choices that are cheaper to implement, less impactful environmentally , and also better utilising existing infrastructure.
