To: Planning Policy

Dear Sirs

I wish to object to the above on the following grounds:

1. The Parvis Road (A245) has had at least 2 surveys carried out on it and it is virtually unusable for 6 hours a day during the commute periods. This is without the proposed new developments outlined in the proposals.
2. There is no infrastructure in place or proposals to help with Health Care. Current waiting time for a Doctors appointment at West Byfleet Health Centre is between 21 and 28 days
3. Most residents in Byfleet will have been affected directly or indirectly as a result of the winter floods of 2012/2013. To consider further buildings on the flood plains will only add to the misery of its residents. We live all year round with flooded drains in Brewery Lane, High Road and the Parvis Road/ High Road corner. Every time it rains these areas become a danger to residents
4. We are a close community and surely the petition signed by over 2500 persons gives some idea of the unity felt by the residents over these proposals and it cannot be ignored
5. We have very little Green Belt left in the Village and these proposals will virtually eliminate the remainder, this is unacceptable

Comments |

1. With recent changes in Government Policy surely Brown field sites and the conversion of Office/Industrial sites to Housing is a preferred option.
2. It is about time that Authorities accept that this area of Surrey is 'Full and we are Fed up' and development and infrastructure needs to be found elsewhere to solve the problem
