Dear Planning,

I am writing to you to inform you about my objection regarding the release of greenbelt land in Byfleet.

The current infrastructure in Byfleet is already inadequate and the building of new homes will only add to more problems. The land proposed has recently been flooded or is identified as at risk of flooding. Our roads are already gridlocked and more cars would cause extra disruption. Byfleet does not have much greenbelt left and if these areas are used then there will be nothing left.

I hope that you will take into consideration my comments when deciding where to release greenbelt land.

Regards

Debbie Jones
