Subject: Pyrford green Belt - keep it green

Dear Ms Jackson

How disappointed we are to hear that Woking council is once again proposing to release green belt land in Pyrford to build around 400 houses.

We live in a 'village' that is congested and busy enough without the prospect of hundreds more homes bringing hundreds more cars.

You only have to walk towards the primary school, or try and park in the church car park, or village hall car park, or park at the shops at school drop off & pick up times to see what I mean.

A child has recently been knocked down on Coldharbour road; I fear the worst if even more traffic comes through the narrow roads which is inevitable if more houses are built.

I haven't even touched on the effect the proposal will have on the special character of Pyrford. It is steeped in history with a beautiful Norman church a stones throw from the proposed site. Surely the green belt was assigned to these spaces to protect the South east from merging into one huge metropolis?

We object strongly to the proposal. Please reconsider.
