Dear Sirs,

I wish to object to the very expensive study undertaken to choose Green Belt Land (which we all could find rather easily) and no expensive study was undertaken to find Brown field sites first.

There is insufficient infrastructure along the Parvis Road to take the increase of additional traffic.

Additional housing means additional bodies who will seek medical attention, it is currently difficult to see Doctors, how will this be addressed?

Will the pouring of additional concrete into virgin soil add to the problems of flooding in this area, has this been thought through?

I do not think the majority of the general public are fully aware of the significance of these proposals as I feel these have not been publicised enough.
