

Upshot lane proposals

I am writing to object to the proposed releasing of two parcels of green belt land either side of Upshot Lane Pyrford.

These proposals would destroy the historic setting and landscape of the area which has changed very little for centuries and is an important and cherished part of historic Pyrford.

It appears that the council has ignored residents representations and has also ignored it's own professional advice.

The surrounding access roads are already overstretched particularly from Ripley and would be unable to cope especially combined with other proposed developments nearby.

I would propose an urgent rethink here.
