Subject: Upshott Lane, Pyrford, potential development

Dear Ms. Jackson,

I'm writing in support of the potential use of fields on Upshott Lane for the creation of additional housing. I live in Pyrford and often cycle along the lane.

I do think that any development should be well planned and should allow residents to walk or cycle safely along to the primary school, church and shops, but people need homes and I don't believe a well-designed development would have a negative impact on our local environment. I understand that several Pyrford organisations, including the annual flower show and scout groups are having difficulty finding volunteers to help run their activities. The additional housing would bring new people to the village and I'm sure would strengthen the life of organisations here.

Kind regards,

Simon Perkins
