

## Green Belt Release

**To:** Planning Policy

**Importance:**High

I would re-iterate all the comments and oppositions already made

ie

Green Belt must be preserved

Byfleet will be gridlocked

infrastructure is inadequate to support current usage

flooding has already taken place on much of the proposed area and the already developed sites

why remove our green belt leaving almost the remainder of Woking's green belt preserved

I strongly object to this green belt release. Already Parvis Road needs a bypass.

From 1500 hrs weekdays it is gridlocked in both directions and more cars will make it even worse.

Emergency services encounter severe difficulties on the not so wide road

A journey that should take 3-4 minutes sometimes even now takes 15-20

minutes before more houses and schools are built

Although just a minnow in this decision, I would like to hope that my objection along with thousands of others will be taken into account
