

Building on green belt land.

The proposed act of vandalism in the Byfleets and Pырford, is totally unacceptable. With no provision for infrastructure in particular the affect on the A245, this is a mad proposal.

There must be brown field land available in the area , has this been considered and if so where is the evidence of this? Why is the council trying to destroy the three villages while preserving all green field sites in Woking? Logic would suggest that further development should be in the town before destroying the surrounding villages. I did not vote for a Conservative council so that they could ignore all conservative principles.
