Pyrford

GU22 8RU

I have lived in Pyrford since September 1967 and I strongly object to the proposed building of 420 houses on the 2 fields either side of Upshot Lane. To remove the Green Belt status from the 2 fields will ruin the natural landscape and views which are very important character of the area. Pyrford is a

Unique village in the Borough because of its well maintained historic buildings and conservation areas.

Pyrford's roads are already very congested and the continuous flow of traffic along Pyrford Common Road to the A3 and M25 would possibly come to a standstill because of the Newark Bridges.

It is proposed to build a new school in Pyrford to replace the existing one, but no provision for an increase in numbers from 400 houses!

There are also the many ecological problems of water, drainage, sewage disposal for such a large proposed development.

I appreciate that homes have to be built to house the increase in population, but surely Woking Borough must have other areas that could be developed, leaving Green Belt areas to be a pleasure to surrounding areas.
