**To:** Planning Policy

I strongly object to building on the Green Belt land. It should be preserved and it's also been flooded before and could flood again.

The traffic situation in Byfleet and surrounding areas is already bad with Parvis Road now queuing from 4pm or earlier sometimes.

Having houses and a private school off Parvis road with no plans to change the road or have another entrance in from Pyrford side is ridiculous. Parvis Road is already at its capacity and cannot take any more cars especially hundreds or even thousands. Most dwellings have one or two cars, a private school will bring in cars from other towns and villages. How will the Health Centre cope with thousands of new patients, it's hard enough to get appointments as it is. We have drainage problems with roads flooding. There are other sites more suitable available so don't choose land that could flood and cause chaos in our once lovely village. Byfleet cannot take any more traffic and dwellings, where will the children go to school as Byfleet is FULL.
