---

Dear sirs,

I am emailing this instead of completing the representation form as we do not have the facilities to return this before the deadline today.

This is due to myself and my partner both being completely unaware of any of these plans until we received a mailing from the Byfleet, West Byfleet and Pyrford residents association.

We were appalled to see some of the plans particularly the proposal reference Gb4 and Gb5. ( 5.83 and 4.40). Our particular concerns are the extreme levels of traffic that already exist in this area which we battle with every day as two working members of the public. The effects the extra traffic would have on our environment and our health. Not to mention the noise from the m25 which is already high. The lack of local primary schools leading to a shortage of school places. The extra pressure the plans would put on on our doctor practices and dentists which are already oversubscribed.

Another large concern for us is around flooding in this area. We have requested to join the Byfleet, West Byfleet and Pyrford residents association but are aware our numbers as residents will not have been included in the response they have submitted in response to regulation 19 consultation December 2018 which sits at 2,800.

Myself and my partner echo their views and wish for our views to be considered and responded too.

Please can you ensure we are made aware of how these developments progress allowing us time to respond which has not been the case in this instance.

Kind regards

Alison Adams & Raymond Standage
